been orgnaized with headat New York City, for the se of urging Congress of the advisability of placing upon the free list wood pulp (mechanical ground wood) and to reduce the duty upon paper. It is claimed that the matter is above politics; that our forests are threatened and that knowledge is taxed. The pulp is made from spruce wood and it is stated that the spruce forests of the East are about exhausted. In compelling newspapers to pay the tariff, it is claimed, forces the reading pubway the intelligence, the seekers of an education, have to pay it. The proposition of the newspaper organization may be for the best interests is attributed the leprosy prevailing in of a large portion of the country, but Oregon can furnish the world with spruce wood for a number of years to come and do so at a reasonable Take Laxative Bromo Quinine Tab-The New York Times speaks as no the subject: "Bleached wood pulp pays a tariff tax of one quarter of a cent per pound. Unbleached pulp pays one-twelfth of a cent per pound if mechanically made, actions proved he told the truth and and one-sixth of a cent per pound if chemically made. The white paper upon which newspapers are printed is taxed three-tenth of a cent per pound The intention and effect of these taxes is to enable American manufacturers of paper to charge a higher price for their product. The interest of the newspaper public in abolition of the tax may be illustrated by an example It is impossible for a newspaper to add to its selling price the exact additional amount which it is forced to pay If the price of foreign-made paper is, say, 2 cents a pound, the duty amounts to 15 per cent ad valorem. But a onecent newspaper cannot increase the price for which it is sold to the public by 15 per cent, or 25 per cent, or any other fraction. It must raise its price 100 per cent or nothing. The public Interest and the interests of the country are most seriously involved in another way. The effect of the wood pulp tax is to hasten the destruction of American spruce forests already seriously encroached upon by the demands of the paper-making industry for this necessary raw material. Across the Canadian border and in Norway and other northern countries there are immense forests of spruce from which,

There has been an epidemic of sui cides over the country during the past week. It is claimed that this class of mania is epidemic. If they would always kill themselves first and not at-
